## THE MOBILE SUIT UNIT THAT FOUGHT AGAINST NEO-ZEON

The unit known as the "Gundam Team" was a collection of mobile suits from the organization AEUG that fought in the Neo-Zeon war. Always first into battle, their efforts became widely known only after the war.

**GUNDAM TEAM**

- ▲ Judau piloted the MSZ-010 ZZ Gundam, a remarkable high performance unit.

- ▲ Haman Karn was the leader of Neo-Zeon and responsible for many allied pilot deaths.

A unit composed of multiple Gundam type suits was rare in the Universal Century.

## GUNDAM TEAM FOUNDATION

Models included the MSZ-010 ZZ Gundam, MSZ-006 Z Gundam, RX-178 Gundam Mk-II and multiple versions of the MSN-00100 Hyaku Shiki.

These units fought until the end of the war while reporting to the battleship Argama and later the Nahel Argama.

- ▲ FXA-08R Mega Rider was used as a support unit

- ▲ The ZZ Gundam was eventually upgraded to the Full Armour ZZ Gundam.

## Exploiting the Gundam Team image with Pachimon

The pirates attacking the shuttle concealed themselves as the Gundam Team by applying **Haribote** to different mobile suits.

A ruse that relies on the poor visibility in outer space to exploit the trusted image of the Gundam Team.

On this page, we'll introduce the source of the mobile suits disguised by the pirates who claimed to be the Gundam Team, and their true identities.

### RX-178 Gundam Mk-II Mimic

Uses the FFSP mass produced mobile suit Barzam as the base machine. Original performance included, but really it's a...

### MSZ-006 Z Gundam Mimic

Z Gundam head, with the unmistakable Zaku II as a body. Also of note, all three units are using Zaku machine guns.

### MSN-00100 Hyaku Shiki Mimic

This fake Hyaku Shiki is covered with gold paint, with a **haribote** unit on the back.
